

Judging Rubric

The Judging Rubric consists of 2 rounds:

- Preliminary Round (All teams)

- Evaluated based on **Core Criteria** focusing on the Business and Solution.
 - **Pre-recorded video** (submit it through the YouTube link)
 - **Proposal**

**** Please set the video as **public or unlisted** to ensure that the video is accessible by the organising committee.*

- Final Round

- Core Criteria from the **Preliminary Round** are **re-evaluated**, along with additional **Secondary Criteria** and criteria are broken down to advance the judging session, this evaluation will include more criteria to further evaluate the project. — **Pitching**
- All finalists are required to perform a live demonstration of their project, where the **judges will assess each team's project functionality**. Team members must **demonstrate** the execution of their project and be prepared to **answer any questions** from the judges.
— **Live Demo**

Preliminary Round

Overview

- *Total weightage:* 100%
 - *Solution to counter the problem:* 85%
 - *Business Strategy:* 15%

Category	Criteria	Weightage (%)	Mark	Description
Solution	Formulation of Concept	30	25 - 30 marks	Exceptional (Highly Feasible & Innovative): • The execution plan is very clear and well-defined, addressing a major problem or opportunity. • The concept is highly feasible for the hackathon case study
			19 - 24 marks	Strong (Feasible and Well-Developed): • The execution plan is clear and well-defined, tackling a relevant problem or opportunity. • The concept is achievable for the hackathon case study
			13 - 18 marks	Adequate (Needs Refinement): • The execution plan is somewhat unclear or lacks detail, but the general concept is understandable. • The concept of completing the concept for the hackathon case study is uncertain.
			7 - 12 marks	Limited (Needs Significant Work): • The execution plan is unclear or poorly defined, making it difficult to understand the problem or solution. • It seems unlikely that the concept can be completed for the hackathon case study

			1 - 6 mark(s)	Unclear or Unfeasible: - The execution plan is completely unclear or not presented at all. - The concept seems unfeasible within the for the hackathon case study
Innovativeness	20		17 - 20 marks	Breakthrough Innovation: - The project brings a totally new idea or solution that could greatly impact an industry or tackle a major challenge. - The solution shows a high level of originality and inventiveness, unlike anything that exists currently.
			13 - 16 marks	Highly Innovative: - The project offers a new and creative way to deal with an existing problem or technology. - The solution stands out with its originality and uniqueness compared to what's already out there. - This innovation could make a big difference.
			9 - 12 marks	Innovative Application: - The project applies existing technologies or concepts in a fresh and imaginative way. - The solution offers a unique twist or improvement on existing methods. - While the level of innovation is moderate, it still reflects a creative approach.
			5 - 8 marks	Limited Innovation: - The project offers a minor improvement or refinement on existing solutions. - The solution doesn't bring much originality and might resemble existing concepts. - The level of innovation is minimal.
			1 - 4 mark(s)	No Innovation: - The project solely depends on existing technologies or concepts without introducing anything new or innovative. - There's no sign of originality in the solution.

	Appropriateness of Methodology	20	17 - 20 marks	Exceptional Methodology: - The technical approach is exceptionally well-defined, innovative, and demonstrates a deep understanding of project goals. - Perfect alignment between methodology and project objectives.
			13 - 16 marks	Effective Methodology: - The technical approach is well-defined, detailed, and effectively supports project goals. - Clear alignment between methodology and project objectives.
			9 - 12 marks	Competent Methodology: - The technical approach is clearly defined and demonstrates understanding of project goals. - Methodology aligns well with project objectives.
			5 - 8 marks	Basic Methodology: - The technical approach is present but lacks depth or detail. - Some alignment with project goals, but not fully articulated.
			1 - 4 mark(s)	Minimal Methodology: - The technical approach lacks clear methodology or is poorly defined. - Methodology does not align with project goals or objectives.
	Design	15	13 - 15 marks	Exceptional (Intuitive & User-Centric): - The design focuses on what users need most and offers an easy-to-use and smooth experience. - The user interface looks great, is easy to navigate, and stays the same throughout the project. - Functions are easily accessible and designed for straightforward use. - The design works well with the project's functions and main idea.

			10 - 12 marks	Strong (Usable and Well-Designed): • The design makes usability a priority, ensuring a straightforward and easy-to-understand user experience. • The user interface looks attractive and stays consistent, paying attention to small details. • Fundamental accessibility features are integrated into the design. • The design fits well with the project's functions and aims.
			7 - 9 marks	Adequate (Needs Improvement): • The design works to some extent, but it could be more user-friendly with clearer navigation. • The user interface might not look very polished and could have inconsistencies in its design. • Accessibility isn't a big priority, or it's only given minimal attention or inconsistently applied. • The design could be more closely linked with the project's functions.
			4 - 6 marks	Limited (Difficult to Use): • The design creates challenges for users in understanding or navigating the project. • The user interface might be confusing or not visually attractive. • Accessibility considerations are minimal or absent. • The design undermines the project's functionality and overall effectiveness.
			1-3 mark(s)	Poor Design: • The design is so bad that it makes it nearly impossible for users to interact with the project. • The user interface looks unprofessional and doesn't follow basic design rules. • The design completely ignores accessibility considerations. • There's no thought given to making the project accessible. The design really holds back the project's potential.
Business	Market Potential and Demand	15	13 - 15 marks	Excellent (Compelling Market Opportunity): • The team demonstrates a deep understanding of the target market and its needs • The solution tackles a big problem or need that many customers have. • There's solid proof, like market research or data, showing that this opportunity exists and is sizable.

			10 - 12 marks	Strong (Clear Market Potential): • The team shows a good understanding of the target market and its needs. • The solution addresses a relevant pain point or unmet need with a defined customer base. • While there's evidence supporting the market opportunity, it may not be as thorough as the highest-tier evidence.
			7 - 9 marks	Adequate (Needs Refinement): • The team's understanding of the target market is somewhat limited or lacks specifics. • The solution addresses a potential need, but the customer base or market size is unclear. • There's evidence supporting the market opportunity, though it might not be as thorough as the top-tier evidence.
			4 - 6 marks	Limited (Needs Significant Work): • The team shows minimal understanding of the target market or its needs. • The solution's market fit is unclear or not well-defined. • There is no evidence or weak evidence to support the market demand.
			1-3 mark(s)	Not Addressed: • The team does not consider market demand or target audience in their presentation.

Final Round

Overview

- *Total weightage: 100%*
 - *Pitching Session: 60%*
 - *Solution to counter the problem: 40%*
 - *Business Strategy: 20%*
 - *Live Demonstration: 40%*

Pitching Session

Category	Criteria breakdown	Weightage (%)	Mark	Description
Solution	Formulation of Concept	15	13 - 15 marks	Exceptional (Highly Feasible & Innovative): • The execution plan is very clear and well-defined, addressing a major problem or opportunity. • The concept is highly feasible for the hackathon case study
			10 - 12 marks	Strong (Feasible and Well-Developed): • The execution plan is clear and well-defined, tackling a relevant problem or opportunity. • The concept is achievable for the hackathon case study
			7 - 9 marks	Adequate (Needs Refinement): • The execution plan is somewhat unclear or lacks detail, but the general concept is understandable. • The concept of completing the concept for the hackathon case study is uncertain.

			4 - 6 marks	Limited (Needs Significant Work): - The execution plan is unclear or poorly defined, making it difficult to understand the problem or solution. - It seems unlikely that the concept can be completed for the hackathon case study
			1-3 mark(s)	Unclear or Unfeasible: - The execution plan is completely unclear or not presented at all. - The concept seems unfeasible within the for the hackathon case study
	Innovativeness	15	13 - 15 marks	Breakthrough Innovation: - The project brings a totally new idea or solution - The solution shows a high level of originality and inventiveness, unlike anything that exists currently.
			10 - 12 marks	Highly Innovative: - The project offers a new and creative way to deal with an existing problem or technology. - The solution stands out with its originality and uniqueness compared to what's already out there.
			7 - 9 marks	Innovative Application: - The project applies existing technologies or concepts in a fresh and imaginative way. - The solution offers a unique twist or improvement on existing methods. - While the level of innovation is moderate, it still reflects a creative approach.
			4 - 6 marks	Limited Innovation: - The project offers a minor improvement or refinement on existing solutions. - The solution doesn't bring much originality and might resemble existing concepts. - The level of innovation is minimal.
			1-3 mark(s)	No Innovation:

				• The project solely depends on existing technologies or concepts without introducing anything new or innovative. • There's no sign of originality in the solution.
	Appropriateness of Methodology	10	9 - 10 marks	Exceptional Methodology: • The technical approach is exceptionally well-defined, innovative, and demonstrates a deep understanding of project goals. • Perfect alignment between methodology and project objectives.
			7 - 8 marks	Effective Methodology: • The technical approach is well-defined, detailed, and effectively supports project goals. • Clear alignment between methodology and project objectives.
			5 - 6 marks	Competent Methodology: • The methodology is clearly defined and demonstrates understanding of project goals. • Methodology aligns well with project objectives.
			3 - 4 marks	Basic Methodology: • The methodology is present but lacks depth or detail. • Some alignment with project goals, but not fully articulated.
			1 - 2 mark(s)	Minimal Methodology: • The approach lacks clear methodology or is poorly defined. • Methodology does not align with project goals or objectives.
Business	Vision and future plan	5	5 marks	Excellent (Compelling Market Opportunity): • The vision is exceptionally clear and inspiring, supported by a comprehensive, detailed, and highly feasible future plan.

			4 marks	Strong (Clear Market Potential): The vision is clear and compelling, with a detailed and realistic future plan.
			3 marks	Adequate (Needs Refinement): The vision is clear and realistic, and the future plan is satisfactory but lacks some detail or feasibility.
			2 marks	Limited (Needs Significant Work): The vision is somewhat clear but lacks detail, and the future plan is vague and not well thought out.
			1 mark	Not Addressed: The vision is unclear or unrealistic, with no coherent plan for the future.
	Competitive Advantages	5	5 marks	Distinct and Unmatched Advantage: - The solution has a clear and well-defined competitive advantage that sets it apart from all other products in the market. - This advantage provides a substantial benefit and makes it difficult for others to compete effectively.
			4 marks	Strong Competitive Advantage: - The solution offers a clear competitive advantage that provides a noticeable benefit over many other products in the market. - This advantage is likely to be difficult for others to replicate within a reasonable timeframe, ensuring a strong market position.
			3 marks	Adequate Competitive Advantage: The solution provides a certain degree of competitive advantage, but it might be comparable to advantages seen in other products in the market.

				Others might be able to achieve similar results with some adjustments or additional development, making the advantage less sustainable.
			2 marks	Limited Competitive Advantage: - The solution's competitive advantage is weak or unclear, providing little differentiation from other products in the market. Others probably have solutions with similar capabilities. - The team shows a limited understanding of the competitive environment within the industry.
			1 mark	No Competitive Advantage: - The solution doesn't have a distinct competitive advantage and seems similar to many other products in the market. - The team doesn't show a clear understanding of how their solution stands out from others, indicating a lack of strategic differentiation.
	Sustainability	5	5 marks	Highly Sustainable: - The project's sustainability plan is strong, ensuring its long-term viability and impact. - It demonstrates innovative and effective practices that are likely to be maintained and scaled over time.
			4 marks	Strong Sustainability Focus: - The project shows a clear commitment to sustainability in its operations and practices. - There are well-integrated features aimed at ensuring the project's continuity.
			3 marks	Adequate Sustainability Considerations: - The project considers sustainability aspects to a reasonable extent, though there is room for further development. - It incorporates some sustainable practices that contribute to its ongoing success and future prospects.
			2 marks	Limited Sustainability Integration: Sustainability considerations are minimal and not fully integrated into the project's long-term strategy.

				Basic sustainable practices are present but may not be sufficient to sustain the project's impact over time.
			1 mark	No Consideration for Sustainability: - The project lacks any sustainability planning or practices aimed at ensuring its continuity. - There are no efforts to address the long-term viability or impact of the project.
	Business model	5	5 marks	Compelling and Feasible Business Model: - The team introduces a clear, well-defined, and creative business plan that turns the project's value into a sustainable source of income. - The model considers target market, pricing strategy, cost, and important partners/resources. - The business model is realistic, achievable within the project's scope, and has high growth potential.
			4 marks	Strong Business Model: - The team presents a well-developed business model that outlines how the project will generate commercial value and be successful in the long run. - The model clearly defines target customers, value proposition, and commercial value behind it. - There is a clear understanding of costs and potential challenges, but some aspects might require further refinement.
			3 marks	Adequate Business Model: - The team shares a simple business idea, outlining how they might bring in commercial value. - The model may have some inconsistencies or lack details on specific aspects like pricing or market strategy. - The feasibility and potential for growth might need further development.
			2 marks	Limited Business Model: - The team's business model is not very clear and has big gaps or issues. - The value of the project isn't shown clearly in how it will bring in income or the target market isn't well defined. - The long-term viability of the model is questionable.
			1 mark	No Clear Business Model: - The team does not present a business model or the presented model lacks any substantial detail. - The team shows a limited understanding of how the project could be commercially feasible.

Live Demonstration

Criteria breakdown	Weightage (%)	Mark	Description
Live Demo Performance	15	13-15 marks	Exceptional (Highly Effective & Engaging): - The live demo is executed flawlessly, showcasing the project's functionality and impact. - The demonstration is interactive, engaging, and effectively communicates the project's key features and benefits. - The team confidently handles technical aspects and any potential issues that arise during the demo.
		10-12 marks	Strong (Well-Executed & Clear): - The live demo is well-structured and demonstrates the project effectively. - There is good engagement, and the audience can clearly understand the project's capabilities. - Minor technical issues may be present but do not detract from the overall demonstration.
		7-9 marks	Adequate (Needs Refinement): - The demo conveys the project's functionality but lacks clarity or engagement. - Some technical issues may occur, impacting the audience's ability to fully grasp the project's potential. - The team may struggle slightly in delivering a confident and smooth demo.
		4-6 marks	Limited (Needs Significant Work): - The demo is disorganized or unclear, making it difficult for the audience to understand the project's value. - Technical issues significantly affect the presentation. - The team lacks confidence in presenting and explaining their project.
		1-3 mark	Poor (Unclear or Ineffective): - The demo fails to effectively showcase the project. - Major technical issues prevent a clear understanding of the project's functionality. - The team is unprepared or unable to explain their project during the live demonstration.

Completeness	15	13-15 marks	Exceptional (Comprehensive & Fully Developed): - The project is fully developed with all necessary components in place. - The solution is well-integrated, and all features function as intended. - The documentation and supporting materials are complete and well-prepared.
		10-12 marks	Strong (Mostly Complete & Functional): - The project is mostly complete, with only minor gaps in functionality or documentation. - All major features work as expected.
		7-9 marks	Adequate (Functional but Needs Refinement): - The project is functional but may be missing key features or require further development. - Some elements of the project may not work smoothly.
		4-6 marks	Limited (Incomplete & Lacking Key Features): - The project is only partially complete, with several missing or non-functional components. - The documentation or supporting materials are lacking.
		1-3 mark	Poor (Not Functional or Missing Major Components): - The project is largely incomplete or non-functional. - Key features are missing or do not work as intended.
UI/UX (User Interface & User Experience)	10	9-10 marks	Exceptional (Highly User-Friendly & Visually Appealing): - The design is intuitive, visually appealing, and enhances usability. - The user experience is smooth, with clear navigation and accessibility features. - Strong attention to detail in typography, color schemes, and overall aesthetics.
		7-8 marks	Strong (Well-Designed & Usable): The design is attractive and functional, with a good balance between aesthetics and usability.

			The user interface is easy to navigate with minor areas for improvement.
		5-6 marks	Adequate (Usable but Needs Refinement): - The design is functional but may lack polish or consistency. - The user experience is somewhat intuitive but could be improved in clarity and navigation.
		3-4 marks	Limited (Difficult to Use or Visually Inconsistent): - The design is cluttered, inconsistent, or hard to navigate. - The user experience is not smooth, and accessibility considerations are minimal.
		1-2 mark	No Consideration for Sustainability: - The design is unappealing and difficult to use. - The interface lacks usability and makes it hard for users to interact with the project.
